

Table of Contents

Chapter 1 Introduction to Chemistry2

- 1.1 The Stories of Two Chemicals3
- 1.2 Chemistry and Matter7
- 1.3 Scientific Methods10
- 1.4 Scientific Research14

Chapter 2 Data Analysis24

- 2.1 Units of Measurement25
- 2.2 Scientific Notation and Dimensional Analysis31
- 2.3 How reliable are measurements?36
- 2.4 Representing Data43

Chapter 3 Matter—Properties and Changes ..54

- 3.1 Properties of Matter55
- 3.2 Changes in Matter61
- 3.3 Mixtures of Matter66
- 3.4 Elements and Compounds70

Chapter 4 The Structure of the Atom86

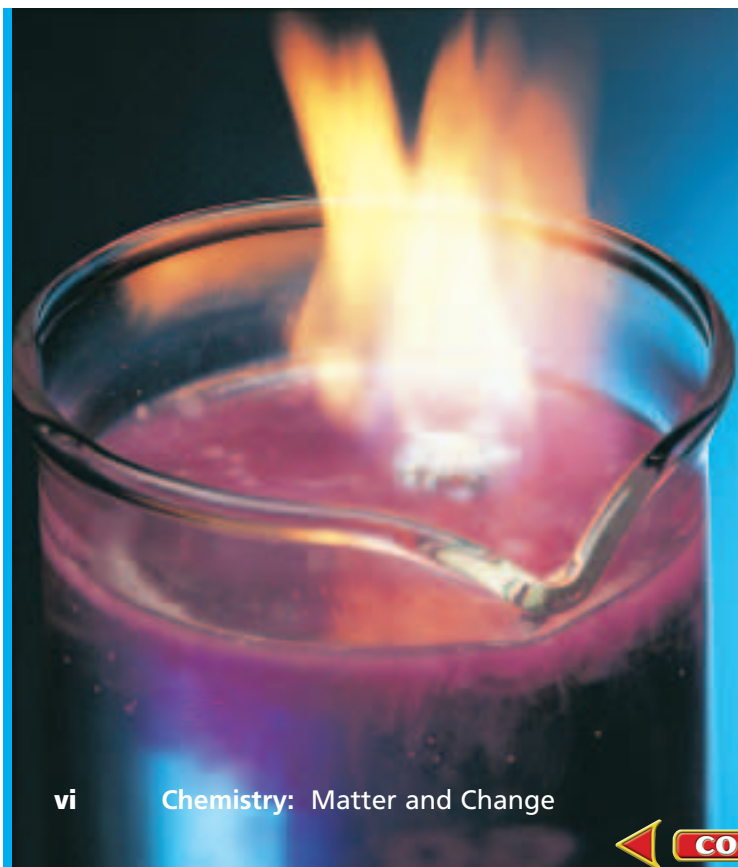

- 4.1 Early Theories of Matter87
- 4.2 Subatomic Particles and the Nuclear Atom92
- 4.3 How Atoms Differ98
- 4.4 Unstable Nuclei and Radioactive Decay105

Chapter 5 Electrons in Atoms116

- 5.1 Light and Quantized Energy117
- 5.2 Quantum Theory and the Atom127
- 5.3 Electron Configurations135

Chapter 6 The Periodic Table and Periodic Law150

- 6.1 Development of the Modern Periodic Table151
- 6.2 Classification of the Elements159
- 6.3 Periodic Trends163

Chapter 7 The Elements178

- 7.1 Properties of s-Block Elements179
- 7.2 Properties of p-Block Elements186
- 7.3 Properties of d-Block and f-Block Elements197

Chapter 8 Ionic Compounds210

- 8.1 Forming Chemical Bonds211
- 8.2 The Formation and Nature of Ionic Bonds215
- 8.3 Names and Formulas for Ionic Compounds221
- 8.4 Metallic Bonds and Properties of Metals228

Chapter 9 Covalent Bonding240

- 9.1 The Covalent Bond241
- 9.2 Naming Molecules248
- 9.3 Molecular Structures252
- 9.4 Molecular Shape259
- 9.5 Electronegativity and Polarity263

Chapter 10 Chemical Reactions276

- 10.1 Reactions and Equations277
- 10.2 Classifying Chemical Reactions284
- 10.3 Reactions in Aqueous Solutions292

Chapter 11 The Mole308

- 11.1 Measuring Matter309
- 11.2 Mass and the Mole313
- 11.3 Moles of Compounds320
- 11.4 Empirical and Molecular Formulas328
- 11.5 The Formula for a Hydrate338

Chapter 12 Stoichiometry352

- 12.1 What is stoichiometry?353
- 12.2 Stoichiometric Calculations358
- 12.3 Limiting Reactants364
- 12.4 Percent Yield370

Chapter 13 States of Matter384

- 13.1 Gases385
- 13.2 Forces of Attraction393
- 13.3 Liquids and solids396
- 13.4 Phase Changes404

Chapter 14 Gases418

- 14.1 The Gas Laws419
- 14.2 The Combined Gas Law and Avogadro's Principle428
- 14.3 The Ideal Gas Law434
- 14.4 Gas Stoichiometry440

Table of Contents

Chapter 15 Solutions 452

- 15.1 What are solutions? 453
- 15.2 Solution Concentration 462
- 15.3 Colligative Properties of Solutions 471
- 15.4 Heterogeneous Mixtures 476

Chapter 16 Energy and Chemical Change 488

- 16.1 Energy 489
- 16.2 Heat in Chemical Reactions and Processes 496
- 16.3 Thermochemical Equations 501
- 16.4 Calculating Enthalpy Change 506
- 16.5 Reaction Spontaneity 513

Chapter 17 Reaction Rates 528

- 17.1 A Model for Reaction Rates 529
- 17.2 Factors Affecting Reaction Rates 536
- 17.3 Reaction Rate Laws 542
- 17.4 Instantaneous Reaction Rates and Reaction Mechanisms 546

Chapter 18 Chemical Equilibrium 558

- 18.1 Equilibrium: A State of Dynamic Balance 559
- 18.2 Factors Affecting Chemical Equilibrium 569
- 18.3 Using Equilibrium Constants 575

Chapter 19 Acids and Bases 594

- 19.1 Acids and Bases: An Introduction 595
- 19.2 Strengths of Acids and Bases 602
- 19.3 What is pH? 608
- 19.4 Neutralization 617

Chapter 20 Redox Reactions 634

- 20.1 Oxidation and Reduction 635
- 20.2 Balancing Redox Equations 644
- 20.3 Half-Reactions 650

Chapter 21 Electrochemistry 662

- 21.1 Voltaic Cells 663
- 21.2 Types of Batteries 673
- 21.3 Electrolysis 683

Chapter 22 Hydrocarbons 696

- 22.1 Alkanes 697
- 22.2 Cyclic Alkanes and Alkane Properties 706
- 22.3 Alkenes and Alkynes 711
- 22.4 Isomers 717
- 22.5 Aromatic Hydrocarbons and Petroleum 722

Chapter 23 **Substituted Hydrocarbons and Their Reactions**736

23.1	Functional Groups	737
23.2	Alcohols, Ethers, and Amines	743
23.3	Carbonyl Compounds	747
23.4	Other Reactions of Organic Compounds	754
23.5	Polymers	761

Chapter 24 **The Chemistry of Life**774

24.1	Proteins	775
24.2	Carbohydrates	781
24.3	Lipids	784
24.4	Nucleic Acids	788
24.5	Metabolism	792

Chapter 25 **Nuclear Chemistry**804

25.1	Nuclear Radiation	805
25.2	Radioactive Decay	810
25.3	Transmutation	815
25.4	Fission and Fusion of Atomic Nuclei	821
25.5	Applications and Effects of Nuclear Reactions	827

Chapter 26 **Chemistry in the Environment**840

26.1	Earth's Atmosphere	841
26.2	Earth's Water	850
26.3	Earth's Crust	855
26.4	Cycles in the Environment	858

Table of Contents

Appendix A	Supplemental Practice Problems871
Appendix B	Math Handbook887
	Arithmetic Operations887
	Scientific Notation889
	Operations with Scientific Notation891
	Square and Cube Root892
	Significant Figures893
	Solving Algebraic Equations897
	Dimensional Analysis900
	Unit Conversion901
	Drawing Line Graphs903
	Using Line Graphs904
	Ratios, Fractions, and Percents907
	Operations Involving Fractions909
	Logarithms and Antilogarithms910
Appendix C	Tables912
	C-1 Color Key912
	C-2 Symbols and Abbreviations912
	C-3 SI Prefixes913
	C-4 The Greek Alphabet913
	C-5 Physical Constants913
	C-6 Properties of Elements914
	C-7 Electron Configurations of the Elements917
	C-8 Names and Charges of Polyatomic Ions919
	C-9 Ionization Constants919
	C-10 Solubility Guidelines920
	C-11 Specific Heat Values921
	C-12 Molal Freezing-Point Depression and Boiling-Point Elevation Constants921
	C-13 Heat of Formation Values921
Appendix D	Solutions to Practice Problems922
Appendix E	Try at Home Labs952
Glossary/Glosario965
Index989
