January 17, 2020

Language Arts

In reading, we are discussing fact and opinion. A fact is something that can be proven true and an opinion can be proven false. We worked on finding words that help us determine if a statement is a fact or an opinion. This week we worked on a new set of vocabulary. We are working on creating movements to help us remember meanings for particular words. We will begin having vocabulary quizzes and vocabulary words will be part of our weekly homework. We also continue to work on non-fiction text features daily. *In writing*, we completed our how to pieces. We also talked a lot about Martin Luther King Jr. and why he is such an important part of our history.

SCIENCE

We completed our work with animal adaptations! The children worked very hard on their projects and I am so proud of their efforts! Next week we will begin our Unit on rocks and minerals.

Math

This week we began working on division. We are learning and practicing different strategies for division. We will continue to practice both multiplication and division strategies. Multiplication and division should be practiced nightly. Please continue to log onto IXL and prodigy at home to practice multiplication and math facts. If you need help logging on please let me know!
