

# F-3 Cahill Superstars Newsletter

January 24, 2020

## Language Arts

*In reading, we continue to work with nonfiction texts. This week we began working on close reading strategies. Each day we are looking at a passage and reading for a different purpose. We continue to discuss fact and opinion. We took our first vocab quiz. The students had a lot of fun working with the words, making google slides, and creating a presentation for their peers! In writing, we are enjoying different biographies. We are noticing different characteristics of biographies and will be writing our own shortly! We continue to write "how to" pieces to practice informational writing.*

## SCIENCE

*We began our Unit on rocks and minerals! We will be exploring all the different properties of rocks!*

## Math

*We are using different strategies to solve division problems and making the connection between division & multiplication. We will continue to practice both multiplication and division strategies. Multiplication and division should be practiced nightly. Please continue to log onto IXL and prodigy at home to practice multiplication and math facts. If you need help logging on please let me know!*
