

F-3 Cahill Superstars Newsletter

January 30 2020

Language Arts

In reading, we are working on our next vocab unit. We are practicing our reading strategies and we learned our new words. We will have our next vocab quiz on Fri the 7th. We are also enjoying close reading and learning how to dig deeper into a text and use text evidence to support our answers! In writing, we are enjoying different biographies. We all chose an influential African American throughout history in honor of Black History Month. We are doing lots of research on our particular person. We will spend the next several weeks learning about many important people throughout history!

SCIENCE

We are beginning to dive into the world of rocks and minerals. We learned that rocks have many properties and the 3 main types are igneous, sedimentary, and metamorphic.

Math

This week we reviewed the properties of multiplication and how they relate to division. We will work on word problems over the next week and continue to strengthen our facts. We are learning that we can check our division answers by doing multiplication. Our multiplication and division assessment will be on Friday February 7th. It will cover multiplication and division.
